Summary

Full Stack Developer with 1+ years of experience building and deploying scalable SaaS web applications using React.js, Next.js, Node.js, TypeScript, FastAPI, and PostgreSQL. Proven track record of delivering production-grade, end-to-end features in Agile/Scrum environments. Hands-on expertise in AI integrations (LangChain, Vapi AI), RESTful API development, real-time systems (WebSockets), JWT authentication, microservices architecture, Docker, and AWS cloud deployments. Passionate about performance optimization and shipping high-quality, maintainable code.

Education

Bipin Tripathi Kumaon Institute of Technology <i>B.Tech in Electronics & Communication Engineering CGPA: 7.0 / 10</i>	2021 – 2025 Dwarahat, Uttarakhand
M.P.H.I.C. Ramnagar <i>Senior Secondary (Class XII) 72.4%</i>	2020 Nainital, Uttarakhand

Technical Skills

Languages: TypeScript, JavaScript (ES6+), Python, HTML5, CSS3
Frontend: React.js, Next.js 15, Tailwind CSS, shadcn/ui, Redux, Responsive Design, Cross-browser Compatibility
Backend: Node.js, Express.js, FastAPI, Fastify, RESTful APIs, Microservices Architecture, JWT Authentication
Databases: MongoDB, PostgreSQL, Prisma ORM, Database Design, Query Optimization
Cloud & DevOps: AWS, Docker, Git, GitHub, Vercel, CI/CD Pipelines, Postman, Unit Testing, Code Review
AI & Integrations: LangChain, Vapi AI, Clerk, Resend, WebSockets, Prompt Engineering, Generative AI
Core Concepts: Data Structures & Algorithms (DSA), System Design, Agile/Scrum Methodology, Performance Optimization, Scalable Architecture

Experience

Full Stack Developer <i>Vigility</i>	Jun 2025 – Present Noida, India
- Engineered scalable frontend architectures using React.js, TypeScript, and shadcn/ui, applying code review and component-driven best practices — reduced UI rework by 30%, improved dev efficiency by 25%. - Designed and built a real-time analytics dashboard integrating RESTful APIs with Node.js and WebSockets, improving reporting efficiency by 40%. - Optimized backend microservices and data pipelines using FastAPI and Node.js (query optimization, caching), reducing system latency by 35%. - Collaborated in Agile/Scrum sprints; participated in sprint planning, code reviews, and daily standups for on-time production deployments.	
Software Engineer Intern <i>YugYatra Retail Private Limited</i>	Apr 2025 – Jun 2025 Bangalore, India (Remote)
- Shipped 10+ full-stack features (RESTful APIs, React UI components, database integration) across agile sprints, reducing deployment turnaround by 25%. - Resolved production performance bottlenecks across Node.js backend and React frontend, improving system reliability by 15%.	

Projects

DentWise — AI-Powered Healthcare SaaS <i>Next.js 15, TypeScript, PostgreSQL, Prisma ORM, Clerk, Vapi AI, Vercel</i>
- Architected end-to-end healthcare SaaS platform; integrated a Vapi AI voice agent to automate appointment scheduling, reducing manual effort by 60%. - Built scalable real-time availability booking system using Next.js 15 Server Actions and Prisma ORM (PostgreSQL), improving scheduling efficiency by 40%. - Implemented JWT-based authentication (Clerk) and automated email notifications (Resend); deployed on Vercel with CI/CD pipeline, reducing missed updates by 30%.
Talent IQ — Live Technical Interview Platform <i>React.js, TypeScript, Node.js, Express.js, MongoDB, WebSockets, Docker</i>
- Built real-time collaborative coding environment with WebSockets (Socket.io) for synchronized multi-user editing, cutting interview setup time by 50%. - Integrated live video and chat features, improving engagement by 35%; containerized with Docker and implemented RESTful APIs with JWT auth and session tracking.

Certifications

Full Stack Web Development | *Udemy*

- Covered React.js, Node.js, Express.js, MongoDB — built RESTful APIs, JWT authentication, and scalable web applications using the MERN stack.

Generative AI & LangChain Fundamentals | *Tutodude*

- Mastered LLMs, prompt engineering, AI agent workflows, and RAG pipelines; integrated Generative AI models for real-world automation and NLP use cases.
